

CoWorking For Kids Stations

- **Station 1:** Students will have their temperature taken (the thermometer will be sanitized between each use), and must have a temperature below 100.3 degrees.
- Students will answer a short health questionnaire detailing potential illness symptoms. So long as the student answers no to all the questions, and has a temperature lower than 100.3, the student will be admitted to the CoWorking Space.
- **Station 2:** Students will immediately put their things down and wash their hands in the student bathroom.
- **Station 3:** Students will set up their desk for the day, setting up their work space.
- **Station 4:** Students will fill in their row on the “Task Board” with their classes, assignments, and any tasks to accomplish that day.
